#### 1. GENERAL

#### 1.1 SCOPE

This specification details the ratings, physical and electrical characteristics and test and inspection data for the component type variants and/or the range of components specified below. It supplements the requirements of, and shall be read in conjunction with, the ESCC Generic Specification listed under Applicable Documents.

#### 1.2 <u>APPLICABLE DOCUMENTS</u>

The following documents form part of this specification and shall be read in conjunction with it:

- (a) ESCC Generic Specification No. 5000
- (b) MIL-STD-750, Test Methods and Procedures for Semiconductor Devices

#### 1.3 TERMS, DEFINITIONS, ABBREVIATIONS, SYMBOLS AND UNITS

For the purpose of this specification, the terms, definitions, abbreviations, symbols and units specified in ESCC Basic Specification No. 21300 shall apply.

#### 1.4 THE ESCC COMPONENT NUMBER AND COMPONENT TYPE VARIANTS

#### 1.4.1 <u>The ESCC Component Number</u>

The ESCC Component Number shall be constituted as follows:

Example: 520200801

Detail Specification Reference: 5202008

Component Type Variant Number: 01 (as required)

### 1.4.2 <u>Component Type Variants</u>

The component type variants applicable to this specification are as follows:

| Variant<br>Number | Based on Type | Case  | Lead/Terminal Material<br>and/or Finish | Weight<br>max g |
|-------------------|---------------|-------|---|-----------------|
| 01                | 2N4033        | TO-39 | D2                                      | 1.2             |
| 02                | 2N4033        | TO-39 | D3 or D4                                | 1.2             |
| 04                | 2N4033        | CCP   | 2                                       | 0.06            |
| 05                | 2N4033        | CCP   | 4                                       | 0.06            |

The lead/terminal material and/or finish shall be in accordance with the requirements of ESCC Basic Specification No. 23500.

#### 1.5 MAXIMUM RATINGS

The maximum ratings shall not be exceeded at any time during use or storage.

Maximum ratings shall only be exceeded during testing to the extent specified in this specification and when stipulated in Test Methods and Procedures of the ESCC Generic Specification.

| Characteristics                               | Symbols           | Maximum Ratings | Unit | Remarks                                |

| Storage Temperature Range                     | T <sub>stg</sub>  | -65 to +200     | °C   | Note 3                                 |
| Soldering Temperature<br>For TO-39<br>For CCP | T <sub>sol</sub>  | +260<br>+245    | °C   | Note 4<br>Note 5                       |

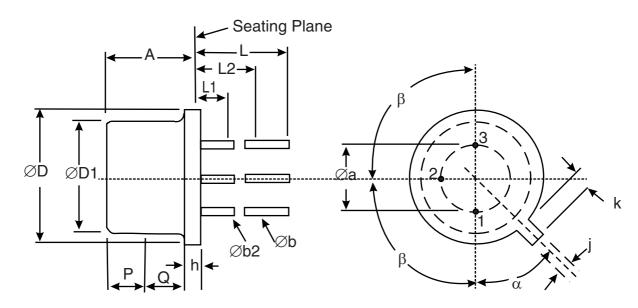

- 1. For  $T_{amb}$  or  $T_{case} > +25^{\circ}C$ , derate linearly to 0W at +200°C.
- 2. When mounted on a 15 x 15 x 0.6mm ceramic substrate.
- 3. For Variants with tin-lead plating or hot solder dip lead finish all testing performed at  $T_{amb} > +125^{\circ}C$  shall be carried out in a 100% inert atmosphere.
- 4. Duration 10 seconds maximum at a distance of not less than 1.5mm from the device body and the same lead shall not be resoldered until 3 minutes have elapsed.
- 5. Duration 5 seconds maximum and the same terminal shall not be resoldered until 3 minutes have elapsed.

1.6

# PHYSICAL DIMENSIONS AND TERMINAL IDENTIFICATION

# 1.6.1 Metal Can Package (TO-39) - 3 lead

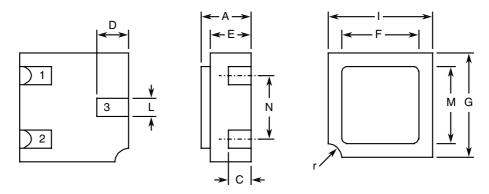

| Symbols | Dimension | Notes |       |
|---------|-----------|-------|-------|
| Symbols | Min       | Max   | Notes |
| Øa      | 4.83      | 5.35  |       |
| Α       | 6         | 6.6   |       |
| Øb      | 0.4       | 0.533 | 2, 3  |
| Øb2     | 0.4       | 0.483 | 2, 3  |
| ØD      | 8.31      | 9.4   |       |
| ØD1     | 7.75      | 8.51  |       |
| h       | 0.229     | 3.18  |       |
| j       | 0.71      | 0.864 |       |
| k       | 0.737     | 1.14  | 4     |
| L       | 12.7      | 19    | 2     |
| L1      | -         | 1.27  | 3     |
| L2      | 6.35      | -     | 3     |
| Р       | 2.54      | -     | 5     |
| Q       | -         | -     | 6     |
| α       | 45° E     | 1, 7  |       |
| β       | 90° E     | BSC   | 1     |

- 1. Terminal identification is specified by reference to the tab position where Lead 1 = emitter, Lead 2 = base and Lead 3 = collector.
- 2. Applies to all leads.
- 3. Øb2 applies between L1 and L2. Øb applies between L1 and 12.7mm from the seating plane.

- Diameter is uncontrolled within L1 and beyond 12.7mm from the seating plane.
- 4. Measured from the maximum diameter of the actual device.
- 5. This zone is controlled for automatic handling. The variation in actual diameter within this zone shall not exceed 0.254mm.
- 6. The details of outline in this zone are optional.
- 7. Measured from the Tab Centreline.

## 1.6.2 <u>Chip Carrier Package (CCP) - 3 terminal</u>

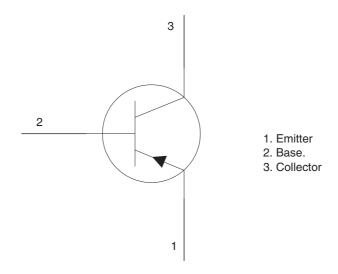

| Symbols | Dimensio | Notes       |       |
|---------|----------|-------------|-------|
| Symbols | Min      | Max         | Notes |
| A       | 1.15     | 1.5         |       |
| С       | 0.45     | 0.56        | 2     |
| D       | 0.6      | 0.91        | 2     |
| E       | 0.91     | 1.12        |       |
| F       | 1.9      | 2.15        |       |
| G       | 2.9      | 3.25        |       |
| I       | 2.4      | 2.85        |       |
| L       | 0.4      | 0.6         | 2     |
| M       | 2.4      | 2.65        |       |
| N       | 1.8      | 2           |       |
| r       | 0.3 TYI  | 0.3 TYPICAL |       |

- 1. Terminal identification is specified by reference to the corner notch position where terminal 1 = emitter, terminal 2 = base, terminal 3 = collector.
- 2. Applies to all terminals.

#### 1.7 FUNCTIONAL DIAGRAM

#### **NOTES:**

- 1. For TO-39, the collector is internally connected to the case.
- 2. For CCP the lid is not connected to any terminal

#### 1.8 <u>MATERIALS AND FINISHES</u>

Materials and finishes shall be as follows:

#### a) Case

For the metal can package the case shall be hermetically sealed and have a metal body with hard glass seals.

For the chip carrier package the case shall be hermetically sealed and have a ceramic body with a Kovar lid.

#### b) Leads/Terminals

As specified in Component Type Variants.

#### 2. REQUIREMENTS

## 2.1 GENERAL

The complete requirements for procurement of the components specified herein are as stated in this specification and the ESCC Generic Specification. Permitted deviations from the Generic Specification, applicable to this specification only, are listed below.

Permitted deviations from the Generic Specification and this Detail Specification, formally agreed with specific Manufacturers on the basis that the alternative requirements are equivalent to the ESCC requirement and do not affect the component's reliability, are listed in the appendices attached to this specification.

## 2.1.1 <u>Deviations from the Generic Specification</u>

None.

#### 2.2 MARKING

The marking shall be in accordance with the requirements of ESCC Basic Specification No. 21700 and as follows.

The information to be marked on the component shall be:

- (a) The ESCC qualified components symbol (for ESCC qualified components only).
- (b) The ESCC Component Number.
- (c) Traceability information.

#### 2.3 TERMINAL STRENGTH

The test conditions for terminal strength, tested as specified in the ESCC Generic Specification, shall be as follows:

For TO-39, Test Condition: E, lead fatigue.

### 2.4 <u>ELECTRICAL MEASUREMENTS AT ROOM, HIGH AND LOW TEMPERATURES</u>

Electrical measurements shall be performed at room, high and low temperatures.

#### 2.4.1 Room Temperature Electrical Measurements

The measurements shall be performed at  $T_{amb}$ =+22 ±3°C.

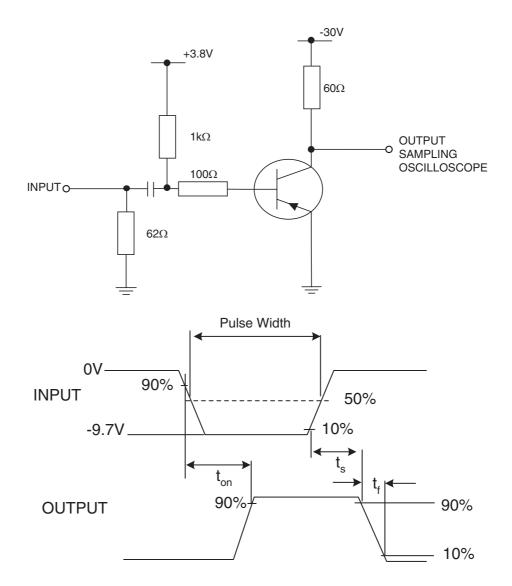

| Characteristics  | Symbols MIL-STD-750  |             | Test Conditions   | Limits |      | Units |

- 1. Pulse measurement: Pulse Width ≤ 300μs, Duty Cycle ≤ 2%
- 2. For AC characteristics read and record measurements shall be performed on a sample of 32 components with 0 failures allowed. Alternatively a 100% inspection may be performed.
- 3.  $t_{on}$ ,  $t_{s}$  and  $t_{f}$  shall be measured using the following test circuit. The input waveform shall be supplied by a pulse generator with the following characteristics:  $Z_{OUT} = 50\Omega$ ,  $t_{r} = t_{f} \le 20$ ns, Pulse Width =  $10\pm1\mu s$ , Duty Cycle  $\le 2\%$ . The output waveform shall be monitored on an oscilloscope with the following characteristics:  $Z_{IN} \ge 100k\Omega$ ,  $C_{IN} \le 12$ pF,  $t_{r} \le 10$ ns.

### 2.4.2 <u>High and Low Temperatures Electrical Measurements</u>

| Characteristics                     | Symbols          | MIL-STD-750 |   |     | Limits |    |
|-------------------------------------|------------------|-------------|---|-----|--------|----|
|                                     |                  | Test Method | Note 1  | Min | Max    |    |
| Collector-Base<br>Cut-off Current   | I <sub>CBO</sub> | 3036        | T <sub>amb</sub> =+150 (+0 -5)°C<br>V <sub>CB</sub> =-60V<br>Bias condition D               | -   | -50    | μА |
| Forward-Current<br>Transfer Ratio 3 | h <sub>FE3</sub> | 3076        | T <sub>amb</sub> =-55 (+5 -0)°C<br>V <sub>CE</sub> =-5V<br>I <sub>C</sub> =-500mA<br>Note 2 | 30  | -      | -  |

#### **NOTES:**

- 1. Read and record measurements shall be performed on a sample of 5 components with 0 failures allowed. Alternatively a 100% inspection may be performed.
- 2. Pulse measurement: Pulse Width  $\leq 300\mu s$ , Duty Cycle  $\leq 2\%$

### 2.5 PARAMETER DRIFT VALUES

Unless otherwise specified, the measurements shall be performed at  $T_{amb}$ =+22  $\pm 3^{o}C$ .

The test methods and test conditions shall be as per the corresponding test defined in Room Temperature Electrical Measurements.

The drift values ( $\Delta$ ) shall not be exceeded for each characteristic specified. The corresponding absolute limit values for each characteristic shall not be exceeded.

| Characteristics                  | Symbols          |                        | Units |     |    |

|                                  |                  |                        |       |     |    |
|                                  |                  | Value<br>Δ             | Min   | Max |    |
| Collector-Base Cut-off Current   | I <sub>CBO</sub> | ±10<br>or (1)<br>±100% | -     | -50 | nA |
| Forward-Current Transfer Ratio 2 | h <sub>FE2</sub> | ±25%                   | 100   | 300 | -  |

#### **NOTES:**

1. Whichever is the greater referred to initial value.

### 2.6 <u>INTERMEDIATE AND END-POINT ELECTRICAL MEASUREMENTS</u>

Unless otherwise specified, the measurements shall be performed at  $T_{amb}$ =+22 ±3°C.

The test methods and test conditions shall be as per the corresponding test defined in Room Temperature Electrical Measurements.

The limit values for each characteristic shall not be exceeded.

| Characteristics                      | Symbols              | Lin | nits | Units |
|--------------------------------------|----------------------|-----|------|-------|
|                                      |                      | Min | Max  |       |
| Collector-Base Cut-off Current       | I <sub>CBO</sub>     | -   | -50  | nA    |
| Collector-Emitter Saturation Voltage | V <sub>CE(sat)</sub> | -   | -150 | mV    |
| Forward-Current Transfer Ratio 2     | h <sub>FE2</sub>     | 100 | 300  | -     |

# 2.7 <u>HIGH TEMPERATURE REVERSE BIAS BURN-IN CONDITIONS</u>

| Characteristics        | Symbols          | Test Conditions | Units |
|------------------------|------------------|-----------------|-------|
| Ambient Temperature    | T <sub>amb</sub> | +150(+0 -5)     | °C    |
| Emitter-Base Voltage   | V <sub>EB</sub>  | 4               | V     |
| Collector-Base Voltage | V <sub>CB</sub>  | 40              | V     |
| Duration               | t                | 48 minimum      | hours |

# 2.8 <u>POWER BURN-IN CONDITIONS</u>

| Characteristics        | Symbols          | Test Conditions   | Units |
|------------------------|------------------|---|-------|
| Ambient Temperature    | T <sub>amb</sub> | +20 to +50  | °C    |
| Power Dissipation      | P <sub>tot</sub> | As per Maximum Ratings<br>P <sub>tot1</sub> derated at the chosen<br>T <sub>amb</sub> | W     |
| Collector-Base Voltage | V <sub>CB</sub>  | -40   | V     |

# 2.9 OPERATING LIFE CONDITIONS

The conditions shall be as specified for Power Burn-in.

# **APPENDIX 'A'**

# AGREED DEVIATIONS FOR STMICROELECTRONICS (F)

| ITEMA AFFECTED   | DECODIDATION OF DELIVATIONS   |
|--|---|
| ITEMS AFFECTED   | DESCRIPTION OF DEVIATIONS   |
| Deviations from<br>Production Control-<br>Chart F2                         | Special In-process Control Internal Visual Inspection. For CCP packages the criteria specified for voids in the fillet and minimum die mounting material around the visible die perimeter for die mounting defects may be omitted providing that a radiographic inspection to verify the die-attach process is performed on a sample basis in accordance with STMicroelectronics procedure 0076637. |
| Deviations from Room<br>Temperature Electrical<br>Measurements             | All AC characteristics (Room Temperature Electrical Measurement Note 2) may be considered guaranteed but not tested if successful pilot lot testing has been performed on the wafer lot which includes AC characteristic measurements per the Detail Specification.  A summary of the pilot lot testing shall be provided if required by the Purchase Order.  |
| Deviations from High<br>and Low Temperatures<br>Electrical<br>Measurements | All characteristics specified may be considered guaranteed but not tested if successful pilot lot testing has been performed on the wafer lot which includes characteristic measurements at high and low temperatures per the Detail Specification. A summary of the pilot lot testing shall be provided if required by the Purchase Order.   |
