 - (b) If C_L is specified, Symbol and measurement shall be f_L .
2. Reference Temperature T_o

For a crystal unit functioning in a non-controlled temperature environment, the reference temperature is normally $+25 \pm 2^\circ\text{C}$.
3. Turning Point Temperature T_{TP}
 - (a) For a crystal unit functioning in a temperature controlled environment (OCXO), the turning point temperature shall be within the limits specified for the reference temperature range.
 - (b) To be specified for OCXO crystal units in addition to the reference temperature.
4. Load Capacitance C_L
 - (a) When a crystal unit must function at its series resonance frequency, C_L shall be infinite.

 - (c) When a crystal unit must function with an adjustable load capacitance, the minimum and maximum limits shall be specified.

N.B.

The tolerance on the load capacitance shall be that value which results in a frequency change not exceeding 10% of the frequency tolerance at T_o or 1% of the nominal load capacitance, whichever is smaller.

5. Rated Drive Level P_o

The rated drive level shall be selected from the standard drive levels specified below:
0.25mW, 0.2mW, 0.1mW, 0.05mW, 0.02mW and 0.01mW at $\pm 20\%$.
6. Frequency Adjustment Tolerance

Because the inductance value may be restricted by other chosen parameters, the Manufacturer shall propose the value of L_1 in accordance with the Customer's requirements.

12. 'Q' Factor

If 'R' and 'L' have been already specified, it will not be necessary to specify the minimum value of the 'Q' factor.

The maximum value of the 'Q' factor is never specified.
