Status:	IMPLEMENTED				

Title: Evaluation Test Programme for Electromagnetic Relays

Number: 2263600 Issue: 1

Other documents affected:

Page:

Para 7.4.8 page 15

Paragraph:

Para 7.4.8 page 15

Original wording:

Proposed wording:

See attachement (modified as per PSWG decisions)

Justification:

- Verification of contamination of contact when testing coils.
- When a DC/DC converter fails, its DC output voltage is often double. So it's important to verify the good function of the relays in these conditions.
- In accordance with ASTRIUM and ALCATEL's requests and with agreements of LEACH, STPI and DEUTSCH.
