Date: 2004/02/16 Date sent: 2004/02/16
Status: IMPLEMENTED

Originator: BAVIERE Philippe
Organisation: CNES

Title: Power Inductors, Moulded, SMD, based on Series SESI

Number: 3201/009 Issue: 3

Other documents affected:

Page:

4.2.5 Deviations from LAT page 10

Paragraph:

4.2.5 Deviations from LAT page 10

Original wording:

Proposed wording:

In a), delete "There shall be no polarisation voltage during test"
and replace by "Shall not be performed"

Justification:

This test have no influence on the coating, neither on the ferrite or on the terminals.
This test have been performed during ETP and during qualification (Chart IV).
