

DOCUMENT CHANGE REQUEST

DCR number 153

Changes required for: Qualification

Originator: BAVIERE Philippe

Date: 2005/03/04

Date sent: 2005/03/04

Organisation: CNES

Status: IMPLEMENTED

Title: Generic Specification for Switches Thermostatic Bimetallic Hermetically Sealed.

Number: 3702

Issue: 1

Other documents affected:

Page:

Para 9.17.3 Test Conditions (Operating Life)

Page 32

Paragraph:

Para 9.17.3 Test Conditions (Operating Life)

Page 32

Original wording:

Proposed wording:

- First alinea : Correct Table 5 instead of Table 1(b).

- Add a third alinea as follows :

" The monitoring equipment shall record both the number of cycles and any failures. If a failure occurs, the monitoring equipment shall discontinue the test. During closure, the contact potential shall be monitored for at least 50 % of the closure period."

Justification:

- Detailed conditions for Operating Life are in Table 5 in the ESCC specifications.

- Monitoring shall be added to be sure the contacts have moved during testing. (COMEPA is compliant with this request)
