DCR number	1576	Changes required for:	N/A	Originator:	Khelifa Hadre
Date:	2023/09/14	Date sent:	2023/05/02	Organisation:	ST Microelectronics
Status:	IMPLEMENTED				

Title: HCMOS Analogue Multiplexer/Demultiplexer, based on type 54HC4051

Number:	9408/064	Issue:	5
---------	----------	--------	---

Other documents affected:

Page:

13

Paragraph:

2.3.1 Room Temperature Electrical Measurements

Original wording:

Input Clamp Voltage 2, :

IIN (Under Test) = 100 mA
VDD = 0V, VSS = Open
All Other Pins Open

Proposed wording:

Input Clamp Voltage 2, :

IIN (Under Test) = 100 μ A
VDD = 0V, VSS = Open
All Other Pins Open

Justification:

Typing error because the Vic2 test conditions were aligned with the old product spec 9408064 issues 1
IIN (Under Test) must be tested at 100 μ A instead of 100 mA
