

## DOCUMENT CHANGE REQUEST

DCR number 171 Changes required for: General

Date: 2005/04/19

Date sent: 2005/04/19

Originator: S Jeffery

Organisation: ESA/ESTEC

Status: IMPLEMENTED

Title: CMOS Dual Monostable Multivibrator, based on type 4098B

Number: 9206/003

Issue:

1

Other documents affected:

Page:

Pages 26 and 27, Table 2 Nos. 79 to 80 (specifically Note 8)

Paragraph:

Pages 26 and 27, Table 2 Nos. 79 to 80 (specifically Note 8)

Original wording:

Proposed wording:

Delete Note 8 and replace with a note stating "Guaranteed but not tested".

Justification:

Subgroups 2 and 3 of Chart F4 (Qualification and Periodic Tests) have replaced ESA/SCC LAT 2/3. Therefore the Electrical Measurements Subgroup for LAT 2/3 no longer exists, and, as described in Note 8, the tests were only required to be performed in the LAT Electrical Measurements Subgroup when part of LAT 2 testing; the tests should be considered guaranteed but not tested.
