

DOCUMENT CHANGE REQUEST

DCR number 1685 Changes required for: General

Date: 2024/11/04

Date sent: 2024/08/30

Status: IMPLEMENTED

Originator: Steve Thacker

Organisation: ESCC Executive Secretariat

Title: Generic Specification for Wires and Cables Electrical 600V Low Frequency

Number: 3901 Issue: 4

Other documents affected:

3902-2

Page:

3901: 34 & 3902: 30

Paragraph:

12(e)

Original wording:

No spool shall receive more than 400 metres of finished coaxial cable; no unit length shall be less than 30 metres.

Proposed wording:

Amend in Para 12(e) the minimum cable length to be 8 instead of 30 metres:

i.e.:

"No spool shall receive more than 400 metres of finished coaxial cable; no unit length shall be less than 8 metres."

Justification:

This DCR is raised on behalf of Manufacturer Gore.

Gore stated:

The value of 30m has shown to be too high for several productions, which was also feedback of several of our customers. We propose to reduce the value from 30m to 8m in both generic specifications.
