DCR number 416 Changes required for: General
Date: 2008/06/20 Date sent: 2008/06/20
Status: IMPLEMENTED

Originator: Anastasia Pesce
Organisation: ESA/ESTEC

Title: Terms Definitions Abbreviations Symbols and Units

Number: 21300 Issue: 2

Other documents affected:

Page:

Para. 2.1.1 Page 4

Paragraph:

Para. 2.1.1 Page 4

Original wording:

Proposed wording:

Add a new first definition as follows:

ESCC Component - A component which may have the benefit of ESCC qualified status by virtue of at least the quality operations (e.g. inspections and tests), as defined in the ESCC Specifications, being performed in one or more, and the delivered component originating from one, of the Member States of ESA or a state or country with a cooperation agreement with ESA. The component shall be freely available to the ESCC User Industry on a commercial basis without let or hindrance, inter alia being free from any form of selective export controls.

Justification:

This definition is added to the ESCC terminology as a means to define the scope of ESCC qualification applicability and is derived directly from a proposed wording recorded at PSWG Meeting No. 24 (Annex3) and approved for implementation into the ESCC specification system under SCSB AI 13.3.
