Page:

Page 26, para 12.4

Paragraph:

Page 26, para 12.4

Original wording:

Proposed wording:

Para 12.4 Chart F4 - Endurance Subgroup 2 Period changed to be 12 Months (was 24 Months)

Justification:

DCR 229 changed the requirement for endurance test period in Chart F4 :
"Para 12.4 Chart F4 - Endurance Subgroup 2 Period changed to be 24 Months (was 12 Months)"
on the following basis :
The 24 month period matches the previous ESA/SCC requalification period, as is still applied for other ESCC QPL listed components (e.g. 4001/022 resistors).

Since PSWG agreed that all generic specifications should be aligned with approved ESCC 5000 and 9000, i.e.
"Chart F4 - Endurance Subgroup 2 Period shall be 12 Months"
ESCC 4009 must be put in line with the agreed policy.
