

DOCUMENT CHANGE REQUEST

DCR number 655 Changes required for: Qualification
Date: 2011/06/09 Date sent: 2011/03/04
Status: IMPLEMENTED

Originator: Bertrand Marty
Organisation: CNES

Title: Chokes, Common Mode, Fixed, Moulded, SMD, Based on Series CMC15, 18 and 22

Number: 3201/010 Issue: 1

Other documents affected:

Page:

Table 3 page 12

Paragraph:

Table 3 page 12

Original wording:

Proposed wording:

Change Limits Min to -75% instead of -50%

Justification:

The specification has been raised for qualification purposes, but at this time Microspire haven't any measurements at high and low temperature. So Microspire have performed a 100% testing for the extension to CMC devices. These measurements reveal that the real limit is too near the limit -50% and sometime slightly over.
