

## DOCUMENT CHANGE REQUEST

DCR number 781 Changes required for: General

Date: 2013/10/09

Date sent: 2013/03/25

Status: IMPLEMENTED

Originator: Steve Thacker

Organisation: ESCC Executive  
Secretariat

Title: Generic Specification for Connectors Electrical Non-Filtered Circular and Rectangular

Number: 3401 Issue: 1

Other documents affected:

Page:

20, 21

Paragraph:

Chart IV & V

Original wording:

See 3401 issue 1 & below

Proposed wording:

Amend the Seal Test and Plating Thickness test boxes in both Charts IV & V as follows:

A) Add the hermetic note to each Seal Test box in:

Note (3) in Chart IV - Subgroups I, II, III

Note (2) in Chart V - Environmental and Mechanical, & Endurance Subgroups

B) Remove the hermetic note from each Plating Thickness box in:

Note (3) in Chart IV - Subgroup I

Note (2) in Chart V - Environmental and Mechanical Subgroup

i.e.

Plating Thickness tests in Chart IV - Subgroup I, & Chart V - Environmental & Mechanical subgroup shall apply to all connector types (not just hermetic connector types).

Justification:

This appears to be a simple editorial mistake in the location of notes 3 & 2 in Charts IV & V respectively.

There appears to be no logic or reason why the plating thickness test in the 2 test subgroups mentioned, should not apply equally to all connector/contact types, as it already does in Special In-Process Controls per Para 5.2.3 and in Chart IV Subgroup V.
