Original wording:

Proposed wording:

In addition to general changes to the specification format/layout/content for the 4000B series as summarised in ESCC approved DCR90, there are some additional specific technical changes to this specification as follows :

1) Maximum Ratings Table (Table1(b)(para 1.5))
Changes to take into account VEE as well as VDD - see attached sheets for current and new table.

Addition of application note as follows:
"Note 3. To avoid draining VDD supply current into the ON Channel when current flows from CH to COM the voltage drop across the ON Channel shall not exceed 0.4V."

2) Electrical test table (Table 2 note 5/Fig 4(h)(para 2.3.1/2.3.3 note 5)) - parameter: Input Voltage tests VIL & VIH.
Addition & clarification of the functional test condition to check for OFF channel current: IOFF<2uA.
- see attached sheets for current and new table & note.
(same change applies to Table 3(a)&(b)(para 2.3.2))

3) Electrical Test table & circuit (Table 2/Fig 4(p) (para 2.3.1/2.3.3 note 8)) - parameters: Propagation times.
Test conditions for channel inputs for tPLH2 (=tPZH1), tPLH3 (=tPZH2), tPHL2 (=tPHZ1), tPHL3 (=tPHZ2) have been amended/clarifed for correct switching. The switching waveforms have also been corrected in Fig 4(p)(para 2.3.3 note 8).
- see attached sheets for current and new table & fig/note.

Justification:

1), 2), 3) - The current specification is incomplete, unclear or incorrect for these requirements.

Note : Manufacturer ST has agreed these changes
