Total re-write

Original wording:

Proposed wording:

Total reformat of this Detail Specification (the first in the range of various ESCC Detail Specifications for discrete semiconductor components under Generic Specification No.5000) as part of the ongoing conversion to the ESCC format. See below for summary of changes and attached Issue 3 Draft A of the specification.

note: known support for active procurement against this specification includes the following Manufacturers:

STM/F (ESCC QPL listed with qualified Variants 01, 02, 04, 05)

SEMELAB/UK (not ESCC qualified but willing to support procurement of Variant 01)

Summary of changes to the current format, layout and content is as follows:

1. Rewording and restructure of various sections and paragraphs of the specification plus other editorial changes based on the layout and editorial content of other Detail Specifications already converted to ESCC format.
2. Deletion of any redundant paragraphs and information, e.g.: Test Circuit, mechanical paragraph.
3. Para 1.7 High Temperature Test Precautions requirements moved to be a note to the Maximums Ratings table.
4. Deletion of obsolete lead finish D7 / Variant 03 from the available range (not supported by STM or SEMELAB).
5. Figure 1 Parameter Derating Requirements moved to be a note to the Maximum Ratings table.
6. Para 4.3.2 Weight requirements moved to Component Type Variants table.

15. Table 3 (High & Low Temp Electrical's): change 100% inspection to be a sample of 5 components with 0 failures (or 100%) (in line with new generic 5000 issue 2 draft F).

16. Table 4: Absolute limits from table 2 have been added for information.

17. Appendix A for STM: para 4.2.2 corrected to delete reference to "para 9.12" as this inspection is a specific in-process requirement to check die-attachment per the STM procedure. STM Procedure number corrected to be 0076637 (was 0011828)

18. Appendix A for STM: Addition of note about wafer level pilot lot testing in that AC characteristics during screening may be considered guaranteed but not tested. Note STM is an ESCC QPL listed manufacturer and this device is ESCC qualified; accordingly there is an ESCC approved PID for this device. This amendment is considered technically acceptable on this basis.

Justification:

Justification (see also change details for each item above):

1. Part of the ongoing activity of conversion of cover-sheeted ESA/SCC specifications to the ESCC format.

2. To make the format and presentation consistent with the various other ESCC Detail Specifications already converted to ESCC format (e.g. 54HCMOS and CMOS 4000B series of ESCC IC specifications).
