**NOTES:**

1. Parameter Drift shall be calculated referenced to the measurement immediately prior to the test in question. An additional initial measurement may be performed prior to the test in question if considered necessary. Drift limits are not specified. Drift Values shall be recorded for information purposes only.
2. The limits specified in Para. 2.4.2, as applicable to the same test temperature, shall apply.
3. The limits specified in Para. 2.4.1 shall apply.

**2.7 RUN-IN CONDITIONS**

The test conditions for Run-in, tested as specified in the ESCC Generic Specification, shall be as follows:

- (a) Test Temperature:  $+22 \pm 3^{\circ}\text{C}$ .
